Academic Year 2025 – 2026

Established 2000 | B.E. in Information Science & Engineering | Intake: 60

1. About the Department

Information science is an interdisciplinary field primarily concerned with the analysis, collection, classification, manipulation, storage, retrieval, movement, dissemination, and protection of information. The Department of Information Science and Engineering (IS&E) at P.E.S. College of Engineering, Mandya takes pride in producing quality engineers over the past 24 years. The credit for all the results goes to the highly motivating staff, from which all students draw inspiration.

The Department was established in the year 2000. The present intake of the undergraduate programme is 60 students. The strength of an IS major lies in his/her ability to apply the knowledge of information systems and technology to help organisations compete more successfully in the marketplace or to streamline current operations.

The focus of the department is to provide students with in-depth knowledge in the field of computer and information technology. The undergraduate curriculum emphasises both theoretical and practical aspects of information science. The curriculum is designed to meet industry standards and cope with the fast-changing technology landscape. Extension lectures and industrial visits are organised frequently to provide an overview of recent and current trends in information technology.

Apart from the curriculum, students are encouraged to participate in research projects, technical events, cultural activities, and sports. The department has a strong alumni network to support curriculum development and career guidance for ongoing student batches. Faculty remains a constant source of inspiration to students in order to achieve outstanding results and excellent placement records.

The department has achieved good placement results, conducted International/National Conferences, sponsored short-term courses, National Seminars, and Symposia. Students from the department are recruited by top IT companies. The presence of alumni at various organisations and reputed universities across the globe has helped graduates plan their future endeavours.
